

CasePak™ 5000

Automatic case or tray packing system

Norland's new CasePak™ 5000 is an economical automatic case packer that handles plastic bottles containing various food products (water, juices, vegetable oil, soft drinks, etc) from 8 oz (240 ml) to 1 gal. (3.79 L) in size.

The CasePak 5000 automatically counts and accumulates bottles to pre-set configurations of 6 x 6, 6 x 4, 2x 3, 2 x 2, and 1 x 3 into corrugated boxes or trays.

Depending on speed of operation, the system can pack three to four cases of 36 bottles each per minute.

An optional automatic lift conveyor is available to raise the filled boxes to the level of shrink-wrappers and case-tapers for easier handling.

Norland has designed the pneumatically-operated CasePak 5000 with the small- to medium-sized bottling operation specifically in mind.

Its clean, simple design makes set-up much easier, compared to other more expensive packaging products, so it's easier to handle and set up. Very few change parts are required, and replacement parts are available at

most local wholesale hardware suppliers. PLC controls contribute to operating efficiency and reliability.

Features and Benefits

- Simple design, for less downtime, great reliability and efficiency
- Easier set-up, adjustments and maintenance
- Versatile, for compatibility with a wide range of conveyor sizes
- Lighter weight, for easy moving
- Unique slide plate and drop knives, to help keep bottles aligned
- Automatically accumulates bottles in pre-set configurations
- Economically priced
