

# Fully Automatic Large-Bottle System Processes 300 to 900 Bottles/Hour\*

Norland International's TritonLine™ automatically and efficiently washes, fills and caps 3 - 5-gallon (12 - 19L) bottles at rates from 300 - 900 bottles per hour, depending upon the model used. Extensively field-tested, these complete systems are built for the long run with the owner in mind, are reasonably priced and easy to service.

The Norland RackStacker™ is designed to work with TritonLine systems but will integrate well with equipment from other companies. The RackStacker eliminates manual lifting and loading of filled bottles - which means the job is done faster and far safer, at rates up to 1,000 bottles per hour.

Our equipment is innovative. Our expert advice is based on extensive bottled water business experience. And our after-sales service is exceptional. But that's only part of the Norland Advantage.

For more details, call us at (402) 441-3737, e-mail us at [bk@norlandintl.com](mailto:bk@norlandintl.com) or visit us at [www.norlandintl.com](http://www.norlandintl.com)
