

Fully Automatic TritonLine™ 3- to 5-Gallon Bottling Plant Produces from 300 to 900 Bottles/Hour*

**TritonLine™
Model 450**

Norland International's innovative TritonLine™ series of automatic large-bottle systems efficiently washes, fills and caps 3- to 5-gallon (12-19 L) bottles. Production capacity is from 300 to 900 bottles per hour, depending on model used. Extensively field-tested, these complete bottling plants are reasonably priced and easy to service. Typically, we ship replacement parts, when needed, within 24 hours of the order.

System features include:

- Easy hook up: just two supply water connections and two drains
- Washer and filler use the same electrical connection.
- Stainless steel construction helps provide longevity and durability—and virtually eliminates maintenance.
- Pre-stretched stainless steel drive chains ride on self-lubricating UHMW support guides to eliminate risk of grease contamination.

Our equipment is innovative. Our expert advice is based on extensive bottled water business experience.

And our after-sale service is exceptional. That's the Norland Advantage.
