

Liberty150

Custom Built to Meet Your Needs

The Liberty150 Automatic Bottle Unscrambler is the perfect labor-saving component to meet the demands of high-speed small bottling lines in a wide range of industries. No longer are employees required to manually load bottles onto a conveyor or rotary feed table. The Liberty150's heavy-duty design and durable construction requires minimal maintenance, thus assuring many years of dependable operation.

Once bottle sizes are programmed into the system, changeovers from one bottle to another is a snap. The system makes the required adjustments effortlessly and accurately – all from the main touchscreen. Other systems require as many as 10 different speed settings to manage throughput. The Liberty150 Unscrambler provides bottlers with increased efficiency, savings and productivity by achieving speeds up to 150 bottles-per-minute.

Your Complete Package

The Unscrambler automates your packaging day as a highly demanded addition to Norland's complete packaging portfolio. Ask your representative for solutions for container feeding, filling, date coding, and more.
