

GlassPak

Custom Built to Meet Your Needs

The GlassPak Glass Bottling Systems are fast, reliable, and consistent. These high-speed rotary bottling lines rinse, fill, and cap up to 33 or 66 bottles per minute. Built with heavy-duty 304 stainless steel the GlassPak can be also be outfitted with a capper for 28mm, 38mm plastic, or ROPP caps.

The counter-pressure filling process uses a double pre-evacuation purging method to reduce D.O. levels. By bottling under pressure, the GlassPak maintains carbonation levels and controls foam expansion. Excess pressure is then vented before the cap is applied to give your craft beverage maximum shelf life.

Your Complete Package

The GlassPak speeds up your packaging day, and several auxiliary options are available to automate your system now or in the future.

In addition to a comprehensive spare parts inventory, you'll receive superior customer support from our team right here in Lincoln, Nebraska with any Norland purchase.
