

RackStacker

Custom Built to Meet Your Needs

The RackStacker eliminates manual lifting and loading of 3 and 5-gallon bottles, significantly improving employee safety and increasing production efficiency. Designed and built with a proprietary alignment system, the RackStacker's accuracy and reliability are unmatched. This highly efficient machine is easy to use, compatible with most rack styles, and easily integrates into your current production line.

The system can be set up to convey filled and capped bottles from your production line directly to the RackStacker for quick loading on delivery trucks or moved to short term storage.

Your Complete Package

The RackStacker automates your packaging day as a highly demanded addition to Norland's complete packaging portfolio. Ask your representative for solutions for container feeding, filling, date coding, and more.

For nearly three decades, Norland has provided complete equipment solutions for the bottled water industry. As part of this solution, the RackStacker allows you to automate your packaging process while providing additional safety and hands-free operation.

Rack up to 600 BPH
