

# ShrinkPak

## Custom Built to Meet Your Needs

The ShrinkPak5000 applies plastic wrap to packages of bottles and coveys them through the heat tunnel. The controlled heat process securely shrinks the plastic around the case, securing the product within the case. Six, 12, and 24-bottle shrink wrapped packages are tamper-evident and protected from dust and abrasions.

Polyethylene Film is used with the Norland ShrinkPak5000 to wrap nearly any beverage package with controlled heat. This unique approach dramatically reduces packaging costs, saving up to 70% of the cost of traditional corrugated material. Simplify your packaging day, and save money with the ShrinkPak5000.

## Your Complete Package

The ShrinkPak is a highly demanded addition to Norland's complete packaging portfolio. Ask your representative for solutions for container feeding, filling, date coding, and more.
