

SmartShot15

Custom Built to Meet Your Needs

The SmartShot15 Tabletop Labeler/Date Coder is designed with the small to medium sized producer in mind. Production speeds of up to 15 round containers per minute can easily be achieved. The system applies pressure sensitive labels to bottles or cans sized between 330ml to 1.5l. The SmartShot15's simplistic design enables quick fixes and easy adjustments. Given the durability and solid structure of the design, the SmartShot provides an affordable and reliable option for date coding and labeling requirements.

Your Complete Package

The SmartShot15 allows you to manually label your containers economically and precisely as a highly demanded addition to Norland's complete packaging portfolio. Ask your representative for solutions for container feeding, filling, date coding, and more.

For nearly three decades, Norland has provided a complete equipment solutions for the bottled water industry. As part of this solution, the SmartShot15 allows for accurate and reliable label application with minimal effort.
